VERSION WITH MARKINGS TO SHOW CHANGES MADE

5. (Amended) A system according to [any one of the preceding claims] <u>claim 1</u> wherein there is further provided means to generate at least one link between each marketplace product definition stored in the marketplace product store to data stored in the enterprise capability store, said links being determined by a requirement in the respective marketplace product definition for specified data in the enterprise capability store, such that a valid marketplace product definition is dependent on presence of said specified data in the enterprise capability store.

6. (Amended) A system according to [any one of the preceding claims] <u>claim 1</u> wherein there is provided means to update associated links in response to updates to the specified data in the enterprise capability store.

7. (Amended) A system according to [any one of the preceding claims] <u>claim 1</u>, wherein the specified data in the enterprise capability store comprises identifiers for instances of apparatus available to support a product identified in a product description.

9. (Amended) A system according to [any one of claims 5 to 8] <u>claim 5</u> which further comprises means to delete any market product definition stored in the marketplace product store in the event that there is no remaining link for that marketplace definition to data stored in the enterprise capability store.
